

2027 Fee Schedule

Recycle Manitoba's 2027 fee rates were calculated using the Four-Step Fee Methodology and the Material Cost Index (MCI). The 2027 average fee rate increased by 13.2% compared to 2026, reflecting a budget increase along with a decrease in the quantity of supplied tonnes.

Fee rates for Aluminum Food & Beverage Cans and HDPE Containers and Bottles had the greatest year-over-year fee increases. Fee rates for Aluminum Food & Beverage Cans increased due to higher overall gross cost and lower overall material revenue. Fee rates for HDPE Containers and Bottles also increased compared to 2026 for the same reasons. Please see the Fee Setting Methodology section earlier in this report for a description of these factors and their impact on material fee rates.
